IPM/PHC Integrated Pest Management & Plant Health Care Training Course

Sterling Consultants L.L.C.

The need to achieve status as a Licensed professional within the tree care industry has become a hot topic in recent years!

A unique series of educational programs in arboriculture have been developed and tested and are now available at a location and time convenient for full time working arborists and those employed in the green industry. This course will provide you with the necessary technical instruction needed to develop proficiency in the diagnosis and proper care of woody plants. This program will provide hands-on instruction and various materials including ANSI A300 Integrated Pest Management and The ISA Best Management Practices for Integrated Pest Management: *PHC/IPM insect and disease management, diagnostics & treatment, cultural, biological and chemical strategies, fertilizers & amendments, plant soil & water relationships, pruning, plant biology, plant identification, selection & planting, ppe and arboricultural operations safety, construction management and remediation, ANSI Z133.1 & A300 best management practices standards, Marketing, Monitoring Reporting and proven business strategies.*

**Course location: Passaic County
Sterling Consultants Lyceum
35 Micklejohn Avenue, Little Falls, NJ. 07424**

**Course fees and registration:
\$395.00 + tax**

Course Schedule:
4 weeks: January 29, 2019 - February 24, 2019
5 hours per week (two) 2.5 hour classes
Tuesday evenings from 6:00-8:30 pm and
Sunday Afternoons from 1:30-4:00pm
for field activities.

Note: ISA Certified Arborist's can earn CEU's needed for recertification by registering and completing this course. This course is being submitted for all industry related continuing education units.

The course is solely designed to educate arborists and plant health care technicians by providing insights on insect and disease lifecycles, the use of fact sheets and available resources to provide concrete factual information and not opinion, when providing clients with the Appropriate Response Process (ARP). The course provides continuing education units to individuals within the tree care industry, the classes will disseminate field proven and cutting edge techniques used in the care and management of trees and woody plants, course fees and classes are separate from any certification cost associated with any group or state agency, this offering shall not be interpreted as an implied guarantee of achieving any title or Certification or any other licensure or fee associated there within.
